

Evoker Quest stats - compiled by pigvomit (aka Tim Rodner)

\*\*\* KEY INFO FOR THE IMPATIENT - Quests 31 and 71 give maximum return on your stamina spent. I recommend Q31 for novices, Q71 for intermediate to advanced players.

Info by request: Gold tokens ARE available at Q71. Bronze and silver tokens ONLY are available at Q31.

High-value cards (Cave Troll, Catapult) are easily available at Q71. Q31 gives mostly medium to low value cards.

### Key to my abbreviations

"#s" = the total number of stamina points you will spend to reach the boss and finish the Quest

"#c" - number of cards you will receive in the quest

"#spc" = "stamina points per card" i.e., the number of stamina points spent to earn each card. Useful if you are looking ONLY for maximum card return. However, does not take into consideration rewards from boss battles - card pieces, tokens, potions, etc.

"stamina per hit" = the cost of stamina points for each click on a monster, leading up to the boss battle

L43-57 got left out completely. I may do them at a later date, or anyone else may compile them. I felt they were not important enough to compile, after I discovered level 31 and level 71.
